

Abstract

Process for generating information models

5

The invention relates to a process for generating information models and also to an information-processing system and a software product for implementing the process.

- 10 A first, master information model is generated in coded form in a first description language and is stored in a database. One or more second, product-specific information models are generated from the master information model by means of first selection parameters and, in each case,
15 stored in a database.
